Florida Standards Review Portal Video Tutorial Script

Slide 1

This is a brief tutorial for how to register an account with EdCredible to review standards for the Florida Department of Education. The preferred browsers are Google Chrome, Safari, Firefox and Microsoft Edge.

First, go to [www.Floridastandardsreview.org](http://www.Floridastandardsreview.org). On the right-hand side of the screen there is a link to contact support. Use this function if you have any difficulty registering an account. Under the register button there is a link to a quick start guide, which is an abbreviated version of this tutorial.

If you already have an account with EdCredible, you do not need to create a new account. Please just click Sign In.

If you do not have an account, click Register.

Slide 2

On the registration screen you will need to first enter an email address. If you enter a personal email address, you will also need to enter a school district name. If you are a school district employee and use your school district email, you will be automatically identified with that specific district.

Next, create a password and confirm your password.

Enter your first name and last name.

Create a screen name and then select a role.

If you've used your personal email address you will only be able to select the role of Parent or Community Member.

Next enter the Captcha characters from the left-hand side of the screen in the blank field on the right that says ‘Enter Text From Left’

Lastly, click the square box to Agree to the Terms of Use.

If you've completed all of the steps on the Registration screen, the submit button will turn from grey to orange and you can now click Submit.
After clicking submit, you will receive an email to authenticate your information. This email will come from notifications@EdCredibleapp.com. If the email does not appear in your inbox, please check your junk folder.

When you click on the link, a new browser window will open to the landing page to access the standards. If the default settings of your computer open the window using Internet Explorer, simply copy the URL, which is fldoe.edcredibleapp.com and paste into a Google Chrome, Safari, Firefox or Microsoft Edge browser.

To begin the review process select Start for English language arts or Mathematics.

Here, we've selected to Start with the mathematics standards review. On this screen you will use the Available, In Progress and Submitted drop-down menus to navigate to the standards by grade level.

To begin reviewing standards by grade level, you will first click on Available.

When you click on Available, a list of grade levels will appear. Click on the grade level and the version of standards, which in this case is the current version of standards for grade 2. Future versions may include revised and/or proposed.

Click Start to bring up the review form for the grade 2 math standards.

If you need to print out the review form, there is a print icon in the upper right-hand corner. Just above the standards, there is a brief introduction and description of the answer choices. As you can see, the first three choices of Eliminate standard, Revise standard, and Move standard will require a comment. If you select No Change Needed, you will not need to enter a comment.

As you scroll down, you will see each of the standards listed. You do not need to review each standard. Standards that do not have a choice selected will be recorded as No Change Needed.
Here we’ve selected revise standard, which requires us to add a comment with a minimum of 50 characters. In the second standard, we’ve selected no change needed, which does not require us to enter a comment.

Your results will auto-save, but it is always a good idea to hit save as you go. The save button is in the bottom right hand corner of the screen.

Slide 10

When you click Save you will get a successfully saved message and you will have the option to either click Done or Continue Evaluation. If you click Done, you will be returned to the previous screen where you can select to review another set of standards by grade level.

If you click Continue Evaluation, you will remain on this screen to continue your review. When you are done with your review for the grade level and ready to submit your review, click the Submit button in the lower right-hand corner.

Slide 11

When you click Submit, you may receive a validation message notifying you that you are missing a required comment. You may also receive a validation message that you did not select an answer choice for some standards. In this case, if you proceed with submitting your review, those standards without answer choices will be recorded as, No Change Needed.

Slide 12

If you are ready to submit, click yes. If your review submitted successfully, you will get a submit successful message. Click OK to be returned to the list of available grade levels to review for math.

Slide 13

Now that we’re back to the review selection screen, you can see that under available we no longer have the option to review grade one or grade 2 math standards. Grade one standards which we’ve only done some work on are now under In Progress. We can continue working on this review by clicking Edit.

The grade 2 math standards review that we just submitted is now under submitted and we can click View to see our response.

To return to the landing page, select the Home icon in the upper right hand corner.
